## What is this product?

### Type

The product is a share class of FTGF Western Asset Short Duration Blue Chip Bond Fund (the "Fund") which is part of the Franklin Templeton Global Funds plc, an investment company with variable capital incorporated with limited liability in Ireland and established as an umbrella fund with segregated liability between sub-funds.

### Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

### Objectives

#### Investment Objective

To seek to maximise income and growth of capital (total return).

#### Investment Policy

The Fund mainly invests in high quality investment grade (or comparable) corporate bonds issued by well-established companies considered to be blue-chip (long-term debt rating of A- or higher by S&P). The Fund will attempt to hedge almost all non-USD exposure to USD. These investments are from developed markets only.

The Fund maintains an average duration below 5 years at the portfolio level (meaning it is less sensitive to interest rate changes than longer duration bond Funds). The Fund will invest only in corporate bonds that in the opinion of the investment manager, are ranked at least senior unsecured corporate debt securities of the relevant issuer.

**Derivatives and techniques** The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

**SFDR category** Article 8 (promotes environmental and/or social characteristics under EU regulations).

For more information see [www.franklintempleton.ie/90703](http://www.franklintempleton.ie/90703)

#### Share Class Policy

Income and gains from the Fund's investments are not paid but instead are reflected in the Fund's share price.

For this share class, the manager intends to apply a NAV hedge "(Hedged)" which intends to minimize fluctuations between the base currency of the fund and the share class currency.

#### Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

#### Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 years. The Fund may appeal to investors who:

**Product availability** The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

**Be aware of currency risk.** In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- Credit risk

For the other risks applicable to this Fund, please refer to the Primary Risks section of the Fund supplement contained within the prospectus of the Fund. This product does not include any protection from future market performance so you could lose some or all of your investment.

Market developments in the future are uncertain and cannot be accurately predicted.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- SEK 100 000 is invested

Costs over Time	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	6 236 SEK	8 591 SEK
<b>Annual cost impact (*)</b>	6.2%	2.9% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.5% before costs and -2.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
